

```
public $serverName = 'localhost'; // server ip
public $dbUserName = 'id18293313_radwa'; // server access username
public $dbUserNamePass = 'EwBA\eiS^%Gu9^E('; // the password of the
specified username, in this case there's no password,
http://localhost/phpmyadmin/server_privileges.php?viewing_mode=server formore
info
public $dbName = 'id18293313_newdb'; // database name
this is db connection in file connection in model
```

there is different regular expression of sku : the one I used it only contains letters with numbers without
—

the sql query of create table in backend folder
